

AI Transparency Declaration Statement

Module: Web Development 55-407821

Task One: Prototype Web Application

SHU AI Transparency Scale (AITS)	AI for Shaping
Transparency Statement	AI has been used to shape the initial and/or final parts of the activity.
AI Contributions	AI is used for shaping parts of the activity. This includes initial outlining, concept development, prompting thinking, and/or improving the structure/quality of the final output.
Human Contribution	Most of the activity is human -developed/generated. AI ideas and suggestions are refined and reviewed. AI outputs are used for discrete and specific goals/outcomes.

Briefly describe how AI was used or confirm that no AI was used.

AI was used for idea development, improving the code structure, and shaping some parts of the code that are related to the prompt and content thinking. Most of the work that used AI was for shaping and modifying, but the final work was primarily human-developed. I do not used AI for writing all of my assessments, and the code work was 100% done by me
